

Meta-Stake Pilots (MSP) Whitepaper

WHAT IS MSP?

Meta-stake Pilots (MSP) is a new Play2Earn (P2E) crypto game. MSP is a Fly2Earn and also a Fight2Earn game. As a Play2Earn game, you can simply pilot a plane and collect and earn MSP tokens and sell them to earn money. As a Fight2Earn game, you can fight against other players to win their funds. Also, you can buy game objects like Fuel, Weapon, Airplanes (Fighter), Helicopter and many other things and prepare yourself for Earning or Combat and sell your earned tokens. Besides, you can buy our NFTs like Gas Station and Auto Pilot to have passive income. Nowadays, there are many ways to earn money in crypto domain, but only few let you earn while enjoying.

Introduction

Easy to Earn Money – Nowadays, there are many ways to earn money in crypto domain, but only few let you earn while enjoying. With MSP as a Play2Earn game, you can simply pilot a plane and collect and earn MSP tokens and sell them to earn money. As a Fight2Earn game, you can fight against other players to win their funds. Players will definitely enjoy playing while earning in this game.

MSP as Play2Earn Game

The game is basically about flying a plane to collect and earn MSP coins. In MSP game, the players can freely play and learn how they can play efficiently. When they were fully ready, they can login to the game with their wallets. After wallet connecting, players will be given a free plane with a free tank of fuel and can play about 30 minutes and collect and earn MSP coins. After consuming all of that free fuel, the players should buy fuel to play again.

MSP as Fight2Earn Game

Players can gain more power through buying different game objects, and be prepared for combats. Every two different players can deposit any arbitrary amount of funds and fight each other to WIN that deposited fund. To have a fair game, players always should check their opponent's power and game objects before accepting the fight invitation.

More Information About MSP Game

After connecting to the players' wallet, they will be given a free plane with a free tank of gas and they can play the game about 30 minutes and collect and earn MSP coins. When free gas was fully consumed, players can only fly again after buying fuel. Immediately after recharging the airplane fuel, players can fly again and start *earning*. In addition to buying fuel, the *earned coins* can be used for *buying new game objects* or they can be *sold* after launch in *Pancakeswap*. MSP coins can be found anywhere in the game environment. Therefore, MSP players can keep on flying and find and collect MSP coins. In this game, some coins can be placed in some locations where the airplane cannot go and reach. Like coins in lower heights, near buildings or trees etc. For these group of coins to be collected, the players need a new game object (like a helicopter to fly between buildings or a rocket to shot, or any other tools due to the coin condition).

Like real world, airplanes will deteriorate over time, and they need to be maintained and serviced to fly effectively. Thus, every player should consider service center when necessary. Airplanes that are properly maintained over time, will have a better edge and movements than others. They will be easier to fly and control, will have a smoother and longer flying time, they will surely consume less fuel.

At the other hand, every game object you have, you bought or build can be sold to other players. For example, players can buy an airplane, improve it with different gadgets and sell it to other players. After a while, you can start fighting with other players for any amount of money you want. Both should deposit the fund and the winner of the fight will win all.

Roadmap

2022 - Q3

Release Single Player Game
Smart Contract Development
Listing App on Google Play
Presale and Launch

2022 - Q4

Listing on CoinMarketCap
Release MSP Game for iOS
Listing on App Store
Release Multi Player Game

2023 - Q1

Release Staking Platform
Release MSP Game for PC
Release WebGL Version of MSP
Game Object Building Platform

2023 - Q2

Create NFT Marketplace
Game Objects Marketplace
Teams Competition Game
Listing on other Exchanges

Tokenomics

Tokenomic

We offer a new way to have passive INCOME using MSP project.

This part will be sent to all MSP holders as staking reward.

5%

Private-Sale

This part will be used for private sale. The raised fund will be used for running presale.

45%

Presale & Liquidity

Presale and Liquidity. Liquidity will be locked for 180 days.

NFT for Passive Income

As mentioned before, players always need fuel to fly around and earn MSP coins. Thus, they should get fuel several times per day. In this regard they need to use gas station object in the game to buy fuel for their airplanes. As a new way for having passive income in MSP project, we have considered a limited number of Gas Station NFTs. Early investors can buy those NFTs and start selling fuel to players in MSP game and have daily income for that. Also, they can sell or transfer their NFTs to other players.

Auto Pilot NFT is another type of NFT in MSP game. Auto Pilot NFTs can be used by players to control their airplanes fully automatically and earn MSP coins without putting much time on taxiing airplanes.

How to Play MSP Game
