

# Meta-Stake Pilots (MSP) Whitepaper

## WHAT IS MSP?

META-STAKE PILOTS (MSP) IS A NEW P2E CRYPTO GAME. MSP IS A FLY2EARN AND/OR FIGHT2WIN GAME. YOU CAN BUY OR BUILD YOUR OWN PROPERTIES INCLUDING CITES, TERRAINS, GAS STATION, AIRPLANES, HELICOPTER, DRONES, ROCKETS, BOMBS AND MANY OTHER FUN THINGS. NOWADAYS, THERE ARE LOTS OF PLAY2EARN GAMES BUT THERE ARE ONLY FEW WHERE YOU CAN PLAY AND EARN WHILE ENJOYING IT.

## Introduction

Nowadays, there are lots of play to earn games, but there are only few where you can play and earn while enjoying it. It's really something that's hard to find and that's what had made us thought and had come up to make a game such as that. Players will definitely enjoy playing while earning in this game.

## MSP as PLAY 2 EARN GAME

The game is basically about flying a plane to collect and earn MSP COINS. In this game, the player will be trained about how everything works specially in taxiing the plane in the beginning. When the players have already familiar with the game, they can now connect their wallet to the app. Upon connecting, player will be given a free plane with a tank full of gas and can fly for about 30 minutes to collect and earn MSP Coins. After consuming all of the gas, the players only can fly again after buying fuel in the game using BNB for their planes. The collected BNBs will be used for presale promotion. All wallets which paid more than 0.25 BNB will be considered as private investors.

## MSP as FIGHT 2 WIN GAME

Players can have more power by buying more gadgets and be prepared for fights. Every two different players can deposit any arbitrary amount of funds and fight each other to WIN that. You should check your opponent's properties before accepting fights to have a fair game.

## More Information About MSP Game

As mentioned before, upon connecting to players' wallets, they will be given a free plane with a tank full of gas and can fly for about 30 minutes to collect and earn MSP Coins. After consuming all of the gas, the players only can fly again after buying fuel in the game using BNB for their planes. The collected BNBs will be used for presale promotion. All wallets which paid more than 0.25 BNB will be considered as private investors. Paying for fuel in BNB is only for before launch and creating liquidity. Thus, in this duration, players can be private investors too at the same time as they are **earning** and **enjoying** the MSP game. The **earned coins** can be used for **buying new game objects** or they can be **sold** after launch in Pancakeswap. MSP coins can be found anywhere in the sky so the player can just keep on flying to find and collect them whenever they can. Now, some coins can be found in some places where the plane cannot fly and reach such as coins in lower heights, forests, above the oceans, buildings etc. These coins have a higher value, but for these coins to be collected, the player will need a new game object (like a helicopter, a drone or any other tools due to the coin conditions). Coins that are harder to get will have a higher value than the easier ones. Obviously, if you want to fly and earn with your plane you will need gas. Gas (fuel) will be available only through purchase in BNB in the game before launch. But for any other stuffs and game objects you will pay in MSP coins. Just like in the real world, planes will deteriorate in time so they need to be maintained well to fly effectively and to last longer thus every player will need to repair their planes when necessary. Planes that are properly maintained will have a better edge and movements than the ones that are not. They will be easier to fly, will have a smoother and longer flying time, will consume less fuel and they will surely have a longer life span. At the other hand, every game object you have, you bought or build can be sold to other players. For example,

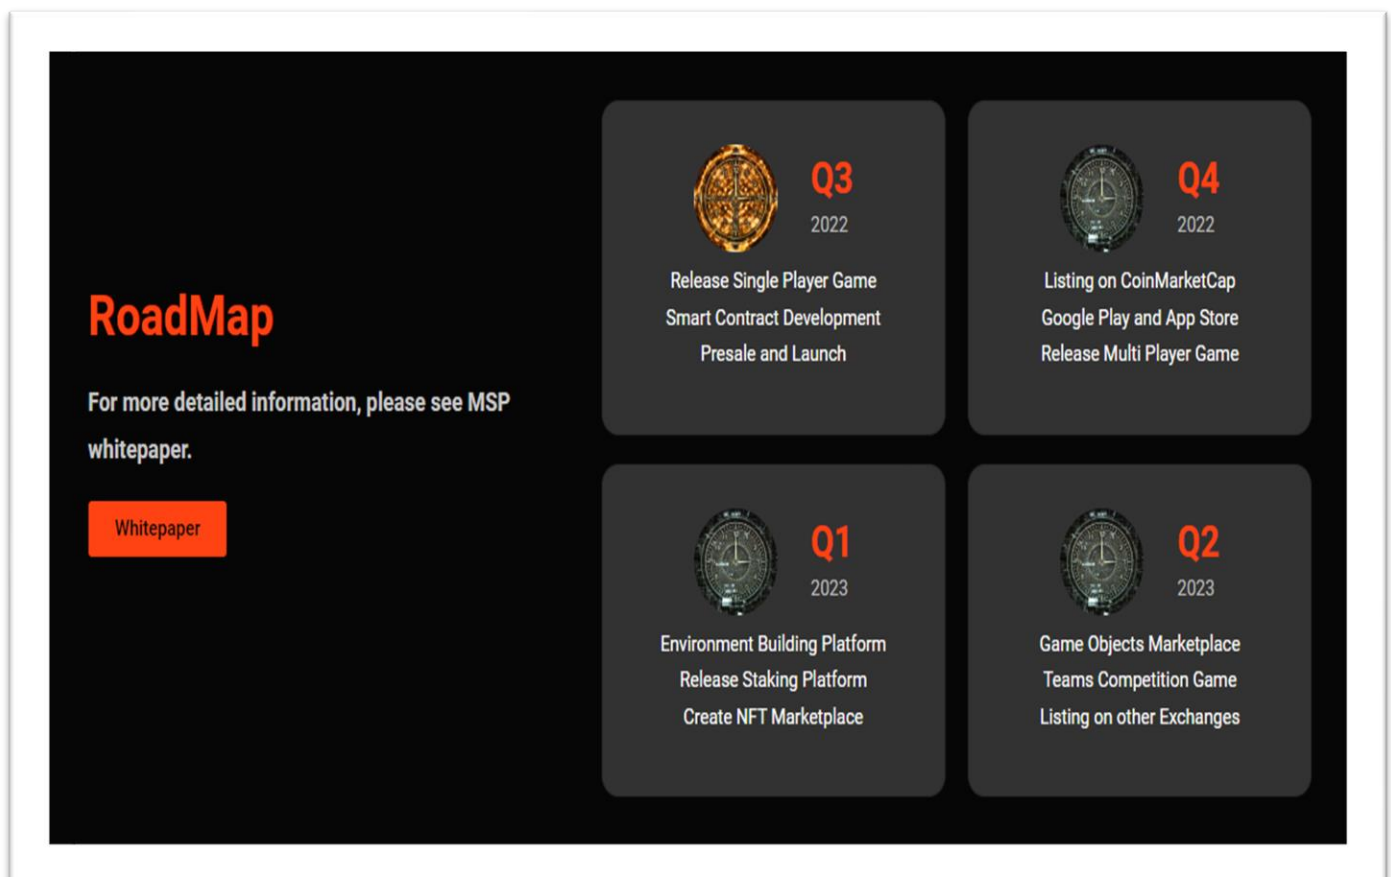

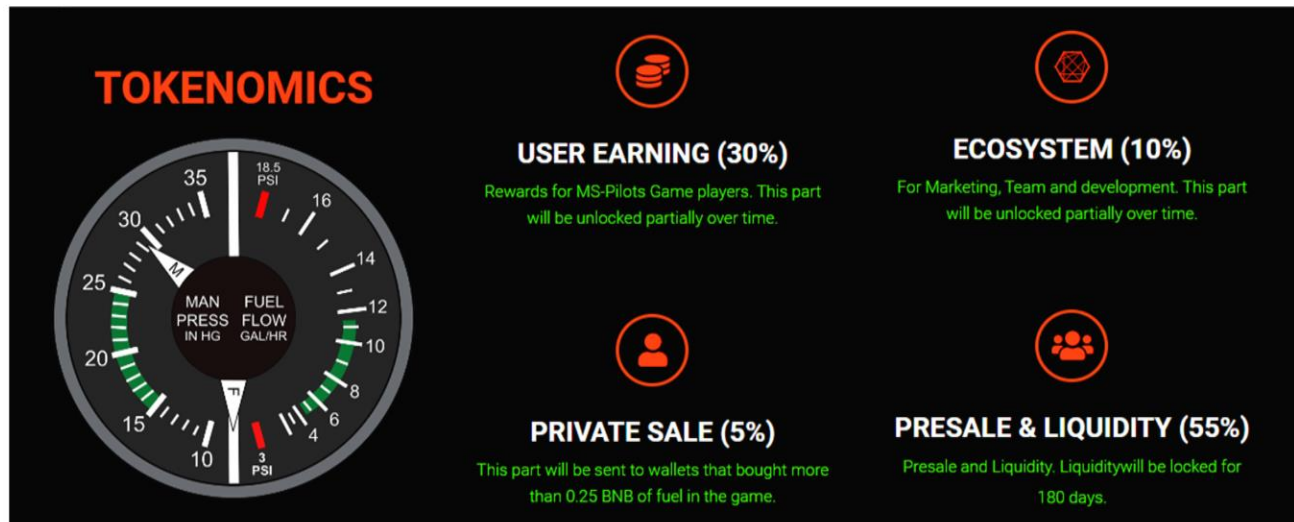

players can buy an airplane, improve it with different gadgets and sell it to other players. After a while, you can start fighting with other players for any amount of money you want. Both should deposit the fund and the winner of the fight will win all.

## Roadmap
